About Me

As a full-stack developer, I am enthusiastic about securing a position that allows me to continue learning, gaining hands-on experience, and honing my skills. I am dedicated to delivering top-quality work and excel in high- pressure environments. With strong decision-making abilities and a talent for problem-solving, I am ready to contribute effectively to your team.

Work Experience

Junior .Full-Stack Developer
November.2023 - Present

TAHALUF AL- EMARAT TECHNICAL SOLUTIONS

EMPRESA

PROJECT

Developed an ERP system using a microservices architecture with CQRS, Kafka, Redis, and DDD for scalability and efficiency. Ensured resilience with Polly, managed tasks with Hangfire, and used MassTransit for service orchestration. Deployed on Azure with PostgreSQL and Docker for consistency and streamlined deployments. Integrated health checks for system monitoring.

Worked with Tahaluf NuGet & npm packages:

- Tahaluf.DynamicWorkflow – Managed workflows using DDD principles for flexible process handling.
- Tahaluf.Notifications.Settings – Handled notification settings and configurations.
- Tahaluf.SingDocuments – Processed and managed documents within the system.
- Tahaluf.FormBuilder – Built and validated dynamic forms.
